	Claims	1-5	NO
Inventive step (IS)	Claims		YES
	Claims	1-9	NO
Industrial applicability (IA)	Claims	1-9	YES

2. Citations and explanations

Reference is made to the following documents:

D1: DE-U-295 10 618

D2: US-A-2002/0129442.

1 INDEPENDENT CLAIM 1

1.1 Document D1 discloses (the reference signs and references relate to document D1):

a turning tool 16 for detaching and fastening a jet regulator or similar sanitary fitted part 17 which by means of a screwed connection is removably held (see page 7, lines 17-20) on the opening side of a sanitary water outlet fitting (see page 7, line 20), wherein the turning tool 16 can be attached to the sanitary fitted part in a non-rotating manner (see page 7, line 8 ff.) and the turning tool 16 is in the form of a sanitary fitted part (in this case a jet regulator 3) or a component of a sanitary fitted part, and wherein the turning tool 16 can be attached to the outside circumference of the fitted part 17 connected to the water outlet fitting such that it cannot rotate.

1.2 The jet regulator 16 in document D1 is not explicitly described as a turning tool. However, it can be used as a turning tool without any structural modifications and is able to detach the fitted part 8 from the water outlet and attach it thereto (see PCT Examination Guidelines, paragraph 5.23). Consequently, all the features of claim 1 are described in document D1 and the subject matter of claim 1 is not novel (PCT Article 33(2)).

2. DEPENDENT CLAIMS

2.1 Dependent claims 2-9 contain no features which, combined with the features of any claim to which they refer, meet the PCT requirements for novelty (PCT Article 33(2)) and inventive step (PCT Article 33(3)) (see documents D1 and D2 and the relevant passages cited in the search report).

3 The subject matter of claims 1-9 is considered industrially applicable (PCT Article 33(4)).
